SENIOR FULL STACK ENGINEER | REACT | NODE.JS | FINTECH

Software Engineer with 6+ years of experience building high-scale fintech and enterprise systems. Strong expertise in React and modern frontend architecture, with working experience across backend systems and APIs. Proven track record of improving transaction success, performance, and user experience at scale (500K+ daily transactions).

Skills

Frontend: React.js, Redux, JavaScript (ES6+), TypeScript, Angular, HTML, CSS

Backend: Node.js, Express, Spring Boot, .NET Core, REST APIs

Performance: Core Web Vitals, Code Splitting, Lazy Loading, CDN, Caching.

Testing: Jest, Playwright (Unit End-to-End Testing)

Concepts: System Design, Frontend Architecture, API Design, Scalability, Design Patterns, Performance Engineering

ACHIEVEMENTS

PhonePe Hackathon Finalist (2024, 2025)

Achieved 6 Rating in Problem Solving on HackerRank.

Experience

PhonePe

August 2022 – Present

Senior Software Engineer

Pune, India

- Led frontend architecture decisions for payment checkout systems, defining scalable design patterns and performance strategies for high-throughput applications.
- Collaborated with core payment backend teams to align & build API for optimized end-to-end checkout performance.
- Improved **payment success rate by 150%** and **increased successful transactions by 200%** across high-scale systems
- Built one-click payment SDK for web, adopted by platforms like **Hotstar** and **Redbus**, improving transaction success rates and reducing user friction.
- Reduced **page load time by 50%** (2MB → <900KB) through bundle optimization, caching, and rendering improvements.
- Increased conversion by **5%** via frictionless login-based checkout & **PhonePe PG BOLT** (eliminating OTP dependency).
- Designed telemetry pipeline for large-scale user behavior analysis and optimization. It helped to improve **transaction success rate by 4%**.
- Implemented unit and auto heal end-to-end testing using Jest and Playwright, improving release reliability and reducing production issues.

One 97 Communications Limited (Paytm)

November 2021 - August 2022

Software Engineer

Noida, India

- Improved load time by **40%** using Redux optimization, CDN, and caching.
- Built OAuth 2.0-based authentication system for scalable user login infrastructure.
- Developed scalable multi-language architecture to support diverse user base.

Tata Consultancy Services

June 2019 - October 2021

System Engineer

Mumbai, India

- Led development of enterprise web applications using React and Angular, automating **60%** of manual workflows and improving training efficiency and user experience.
- Built REST APIs and full stack applications enabling integration across enterprise systems (Microsoft Dynamics, Power BI etc.).
- Automated workflows in Microsoft Dynamics 365, reducing manual effort and operational overhead.

Education

United College Of Engineering & Research, Allahabad

Aug 2015 – June 2019

B.Tech in Information Technology

71.6%
